🪪 PROFILE

I bring over ten years of experience as a full-stack engineer in web and mobile app development. My proficiency spans the entire development cycle, with a specific focus on front-end development using modern JavaScript libraries and frameworks. I'm recognized as an expert in JavaScript and Shopify. My passion for continuous learning, adaptability as a team player, and innovative problem-solving skills drive my work.

🧠 SKILLS

Frontend
Vue, Angular, React, JavaScript/TypeScript, Tailwind

Content Management System
Shopify, Hydrogen, Polaris, Liquid

Database Management Systems
MongoDB, MySQL, Redis

Backend
Node.js, Express, PHP, Laravel, GraphQL

Version Control Tools
Git(Github, Gitlab), SVN

DevOps
AWS(Lambda, API Gateway, Elasticsearch, S3, EC2), Firebase, Docker, Kubernetes, Testing tools (Cypress, Mocha, Jest, Enzyme)

💼 PROFESSIONAL EXPERIENCE

PieSoft, Senior Full Stack Engineer   Aug 2021 — Aug 2023
Bethlehem, United States

- I contributed to a marketing platform project, employing a technology stack that included React, Vue, Next.js, Nuxt.js, Node, Java, Spring, and Laravel.
- I successfully set up AWS API Gateway to host the Laravel API using AWS Lambda functions.
- Additionally, I created Elasticsearch queries to ensure fast and precise search functionality and designed scalable RDS instances for relational databases.
- I also played a role in mentoring junior developers.

sophilabs, Full Stack Engineer   Jul 2018 — Jul 2021

NYC, United States

- Developed and customized e-commerce websites using technologies like React, Shopify, Hydrogen, Polaris, Liquid, GTM, Google Analytics 4.0, Google Ads, MySQL, and Google Map API.
- I have expertise in crafting visually appealing and interactive Shopify stores using modern JavaScript frameworks and Shopify's design systems.
- I've optimized performance with serverside rendering, seamlessly integrated the Polaris design system, and customized themes with React and Vue.js while leveraging Shopify's Hydrogen framework and Liquid templating language

mark2market, Software Developer   Apr 2013 — Jun 2017

Sao Paulo, Brazil

- Built website using Laravel, utilizing MySQL for the database, and a RESTful API for the backend.

Freelancer, Software Developer   Oct 2011 — Apr 2013

🎓 EDUCATION

Bachelor of Computer Science,   Apr 2007 — Sep 2011

Federal Technological University of Paraná   Rebouças, Curitiba, Brazil
